

EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech	Indian Institute of Information Technology, Una	8.93 (Current)	2024-Present
Senior Secondary	DAV Public School	95.0%	2022-2023
Secondary	Heritage Academy	96.4%	2020-2021

PROJECTS

- Eleware — Student Dropout Prediction System

Python, MongoDB Atlas, FastAPI, Model Stacking, Optuna, scikit-learn

Oct 2025 – Dec 2025

Github

– Built an end-to-end ML pipeline trained on **10,000+** records to predict student dropout risk using a stacked ensemble of **RandomForest, LightGBM, CatBoost, and XGBoost**, achieving **ROC-AUC of 95%** and **F1 score of 90%**.

– Applied Optuna for automated hyperparameter tuning across all models, reducing false negatives — the highest-cost error class in dropout prediction — compared to untuned baselines.

– Developed a **FastAPI** REST endpoint backed by **MongoDB Atlas** to serve real-time predictions, enabling integration with student information systems.
- AI Research Assistant — Multi-Agent Research Platform

CrewAI, OpenAI GPT-4o-mini, Tavily Search, FastAPI, Streamlit, Python

March 2026

Github

– Engineered a **multi-agent AI pipeline** using CrewAI with 3 specialized agents (Researcher, Summarizer, Report Writer) running sequentially to produce structured research reports from live web data.

– Integrated **Tavily Search API** for real-time web retrieval and **OpenAI GPT-4o-mini** for LLM inference, enabling the system to answer queries on any topic with current, factual information.

– Built a **FastAPI** backend exposing 4 endpoints (/research, /compare, /plan, /structured-report) and a **Streamlit** frontend with PDF export, delivering research reports in multiple structured formats.
- FormSaathi — Multimodal AI Agent for Indian Government Forms

YOLOv8n, Surya OCR, GPT-4o-mini, LlamaIndex, ChromaDB, FastAPI

May 2026 – July 2026

Github

– Built an end-to-end multimodal pipeline combining **YOLOv8n** (fine-tuned on **2,000+ annotated fields** across 9 Indian form types, **mAP@0.5 = 0.806**) and **Surya OCR** to detect and extract fields from any government or bank form (PAN, Aadhaar, EPF, KYC).

– Designed an **OCR-grounded LLM agent** using GPT-4o-mini with RAG (LlamaIndex + ChromaDB) that reasons exclusively from extracted form text — eliminating hallucination from form misclassification across unseen form types.

TECHNICAL SKILLS

- Languages: Python, C/C++, MySQL/PostgreSQL
- ML / DL Frameworks: Scikit-learn, PyTorch, NumPy, Pandas, Transformers (HuggingFace)
- GenAI & Agents: LangChain, LangGraph, Prompt Engineering
- CS Fundamentals: Object-Oriented Programming, Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS
- Web / Backend: FastAPI, Streamlit, REST APIs
- Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Docker, Render, Power Bi, MS Excel

KEY COURSES TAKEN

- CS Fundamentals: Object-Oriented Programming, Data Structures & Algorithms, Operating Systems, Computer Networks, DBMS, Competitive Programming
- Machine Learning: Complete Data Sciecnce, Machine Learning,DL,NLP Bootcamp (Udemy)

POSITIONS OF RESPONSIBILITY

- Member,Force Club, IIIT Una
- 2024 - Present

ACHIEVEMENTS

- Competitive Programming,Solved **500+** problems across LeetCode, Codeforces, and CodeChef
- 2024–Present
- CodeChef,Achieved **2-Star** rating on CodeChef Competitive Programming Platform
- 2026
- Algo University – DP Camp,Selected among **4,000** shortlisted from **40,000+** applicants; completed the camp and earned certificate (top **1,000** finishers)
- Apr 2026
- Hackathon Finalist,National-level Hackathon, IIIT Gwalior
- Apr 2026
